Attachments: ROC exception from 070207 FnlSurveyUnitProjReportAbstract_010909.pdf

Hi Wayne,

Here is the extracted page from the SUPRA.

Have a good weekend!

Subject: origin of 152 cubic meters (200 cubic yards) and 25 samples

Hi Wayne,

I tracked down the original basis for the 152 cubic meter (200 cubic yard) batch to the original Parcel G Work Plan. The discussion about 25 samples per batch is mostly in the RTCs. Please see attached files, which include individual pages that reference these issues.

I was unable to find a reference that requires analysis of other ROCs. The original SUPRA (abstract for the SUPRs) has a vague reference to exceptions to the ROCs, but does not specify what that means.
